Current Psychiatry Vol. 9, No. 10 53 H allucinations in children are of grave concern to parents and clinicians, but arenâ€™t necessarily a symptom of mental illness.

Hallucinations in children: Diagnostic and treatment

In psychology and neuroscience, executive dysfunction, or executive function deficit, is a disruption to the efficacy of the executive functions, which is a group of cognitive processes that regulate, control, and manage other cognitive processes. Executive dysfunction can refer to both neurocognitive deficits and behavioural symptoms.It is implicated in numerous psychopathologies and mental ...

POLICYSTATEMENT Sensory Integration Therapies for Children

INTRODUCTION. Children with Down syndrome have multiple malformations, medical conditions, and cognitive impairment because of the presence of extra genetic material from chromosome 21. 1,2 Although the phenotype is variable, there typically are multiple features that enable the experienced clinician to suspect the diagnosis. Among the more common physical findings are hypotonia, small ...

Stroke is brain damage that occurs secondary to the blockage or breakage of blood vessels in the brain. The causes of stroke in children are many and often not well understood. Diagnosis requires careful clinical examination combined with brain imaging. Early treatment focuses on protecting the brain and keeping blood vessels open to prevent more strokes.
