Bell's theorem is a "no-go theorem" that draws an important distinction between quantum mechanics and the world as described by classical mechanics particularly concerning quantum entanglement where two or more particles in a quantum state continue to be mutually dependent at large physical separations. This theorem is named after John Stewart Bell.. A series of experiments has verified the ...

Bell's theorem - Wikipedia

Hecataeus's map describes the earth as a circular plate with an encircling Ocean and Greece in the centre of the world. This was a very popular contemporary Greek worldview, derived originally from the Homeric poems.
