It is a golden opportunity! - Liquid Gold

Includes some interesting history and lore of urine throughout the ages, and then a pointed argument for the use of urine as a fertilizer instead of as a pollutant. This is particularly appropriate since the main nutrient component of urine is nitrogen which is currently made using natural gas for synthetic chemical fertilizers.

Liquid Gold: The Lore And Logic Of Using Urine To Grow

I watched some idiot video about techniques to neutralize urine and separate out the nutrient from the liquid,

they had a 3 stage process in the end u ended up with powdery crystal's and leftover dark urine which they threw out.
