Applications Modelling and simulation. One application of scientific modelling is the field of modelling and simulation, generally referred to as "M&S". M&S has a spectrum of applications which range from concept development and analysis, through experimentation, measurement and verification, to disposal analysis.

Scientific modelling - Wikipedia

Molecular modelling encompasses all methods, theoretical and computational, used to model or mimic the behaviour of molecules. The methods are used in the fields of computational chemistry, drug design, computational biology and materials science to study molecular systems ranging from small chemical systems to large biological molecules and material assemblies.

www.gstat.org Whether planned or not, you just landed at www.gstat.org. This domain was the main point for the gstat project, which started in 1993, open sourced in 1997, got a website a bit before 2000, then remained in Utrecht, where it was taken down in 2014 because it fell victim to botnet attacks.

The 3rd Li-SM 3 conference will again bring together the world's leading academics, scientists and engineers to discuss the priority areas of lithium sulfur battery chemistry research. It will begin with an introduction to the chemistry for newcomers and highlights of the key challenges, followed by dedicated sessions on each key topic, a poster session and a dinner.
